
Yin + Yang

Natural Stone

POWER PACK
OCTOBER 2014

 **CROSSVILLE®**

Yin + Yang

Natural Stone

Product Overview

- Eight color groupings
- Seven distinct and modern patterns
- Suitable for interior floors and walls
- Adds elegance to both residential and commercial spaces
- Sizes offered: 1/2 x 1/2 Mosaic, 1/2 x 1-1/2 Stacked Mosaic, 1 x 3 Herringbone, Linear Mosaic, 1 x 3 Elongated Hex, 3 x 12 Plank and 1-1/2 x 6-1/2 Brick
- Stocked in Crossville

Positioning Statement

At the heart of design is the art of balance. Find yours with Yin + Yang, a harmonious collection of natural stones. The minimalist shapes of Yin + Yang take their inspiration from Eastern architecture. Seven distinct and modern patterns interplay with one another, creating a design unique to you. From clean linear mosaics to dramatic elongated hexagonals,

Yin + Yang is the perfect combination of form and function. The eight stones may be used for interior and exterior walls and interior floors except where standing water may occur, as a single color or with one another. The result is nothing short of Zen-like, bringing to you peace of mind and to your space the unity of nature.

Purchasing Information

Inventory Location and Availability – All Yin + Yang tile is stocked in Crossville, Tennessee, and ready for immediate delivery. Pricing for Yin + Yang has been posted on Crossville-Connections. Normal distributor discounts apply.

3 x 12 Plank	20	5.4	72	388.8
Linear Mosaic	5	4.76	72	342.72

Installation Considerations

Proper methods and precautions should be taken when installing natural stone products, which include, but are not limited to:

Stone Facts

- With natural stone tile, facial dimensions and thickness can vary. Significant variation is part of the beauty of stone. Expect wide range in color, tone, and veining. Given these irregularities, it is suggested that 10 - 15% additional material be ordered to offset necessary sorting.
- Marble products contain holes, voids, fissures, dry seams, and other characteristic flaws that may be filled with resin that have a similar color and texture as the stone. These areas may appear slightly rough or dull under reflective light. Voids can sometimes lose their fillings and should be refilled as part of normal maintenance of the stone.
- The darker the marble, the softer the material tends to be and is therefore subject to scratching if used on the floor. Black Dragon is soft regardless of coloration and subject to scratching. When soft stones are used on floors, limiting the use to medium to light traffic areas is advised along with use of adequate walk-off mats or carpets. Unsanded grout is recommended.

Setting Materials – Installation

- All installation methods used should be consistent with recommendations by the Marble Institute of America and/or the Tile Council of North America.
- When choosing mortars, grouts, and sealers, select all from a single source and follow the manufacturer's instructions.
- Use a white medium bed mortar modified with latex or dry polymers and compliant with ANSI 118.4. This mortar's additional sand content can assist in compensating for variation in both substrate and tile thickness. Some natural stones will stain if traditional cement-colored mortar is used.
- Back buttering the stone tiles ensures that 100% contact extends to all corners and edges and that the tile is fully supported.
- The mosaics and larger field tiles must be sealed prior to the grouting process, again upon completion of the installation, and periodically thereafter to enhance and maintain the beauty of the stone.
- All natural stone is porous and therefore subject to staining. Regular application of a sealer provides reaction time for cleaning to occur. It does not make the stone "stain proof."

- Unsanded grouts are typically chosen given the popularity of narrow grout joints (1/8" or less), the polished finish and the soft composition of many of the stone products. Dark or heavily pigmented grouts should always be tested prior to use with your stone selection to avoid absorption and staining.
- The linear mosaic is an exception to the above. Given the grout joint size, the finger joints that connect each sheet and the numerous pits on the face of the stone, the use of a sanded grout is necessary.

Substrate Preparation

- Make sure the substrate upon which you're installing the tile is suitable for the application of natural stone. If grout joints narrower than 1/8" are desired, improving the substrate to 1/8" or less in 10 feet and 1/32" in 1 foot to be compliant with the ANSI specifications.
- Suitability of the substrate includes: structural stability, no cracks or fissures, flatness and clean/free of contaminants that may affect bonding.
- Exercise proper surface preparation and cleaning to ensure an effective bond.
- Dust and dirt can accumulate on all natural stone tiles; they should be thoroughly wiped and cleaned prior to installation to ensure an effective bond.

Recommended Usage

Yin + Yang natural stone is recommended for interior and exterior walls. **It is recommended for interior floors except where standing water may occur.** Yin + Yang is not suitable for the lining of pools, fountains, or spas.

This natural stone displays a wide variation in colors. Please refer to CrossvilleInc.com for photos. Always work from at least four cartons to ensure blending of the tile

Cleaning Procedures

Regular cleaning is the best way to keep Yin + Yang tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

Crossville Sample Express

For samples of Yin + Yang tile, simply call Crossville Sample Express. We can quickly deliver samples of Yin + Yang tile directly to your location or to another address you specify. To reach the knowledgeable Sample Express team, call toll-free 800.221.9093.

Residential Lifetime Quality Warranty
