# FLOOR

WALK IN

## FLOOR COLLECTION

Solid Glaze, Semi-Matte Finish  
Residential Usage

Walk this way. Our gorgeous porcelain floor tiles and mosaics offer you a world of choices. Choose from hexagon or octagon shapes in solid white, bone or black, then finish with dots in six coordinating shades. Or add tranquility with our porcelain mosaic tiles in pinwheel white, bone or white and black, plus hexagon bone or white. The finish is semi-matte—pleasing to the touch!

Due to the nature of our tile, a certain amount of variation in color, shading, surface and texture are to be expected.

# INSTALLATION & MAINTENANCE

## Ceramic Tiles & Porcelain Mosaics

**Setting Materials:** Adhesive – Install with any high quality ceramic tile adhesive suitable to the intended application. Mud installation can be done as well. All setting materials and installation methods should be done using the prevailing guidelines set by A.N.S.I. and the Tile Council of America.

**Method:** Follow standard ceramic tile installation procedures provided by the Handbook for Ceramic Tiles Installation and the A.N.S.I. specifications. Relief decorative borders or liners can be taped off during grouting to facilitate clean up. To help keep border, liner, and molding grout joints tight, offset the joints between field tile, trim, and accent rows.

**Grout:** Un-sanded grout is typically used for grout joints 1/8" or smaller. Sanded grout is recommended for grout joints larger than 1/8", but not for gloss finishes.

**Crackle Glaze:** We recommend sealing these tiles with a penetrating sealer if a naturally aged look is desired. The sealer penetrates the fine, hairline fissures in the glaze and prevents dirt and dust from darkening the crackle over a period of time. This also makes it easier to clean and maintain. With Crackle Glaze Tiles (OCEAN & HAMPTON COLLECTIONS) sealing with a penetrating sealer before and after grouting is mandatory. We do not recommend the use of contrasting color grouts with this type of glaze.
