Variation, Usage & Technical Information

Variation

Miramar Mosaics are dimensional tiles and will exhibit variation in color and glaze pooling. There will be some color variation between the 2"x8" Field and Mosaics, due to the difference in surface elevations and pooling.

Variation between samples and tiles received is possible, as handmade techniques of glazing make shade and color variation an inherent part of the product. Samples received before shipments should be considered indicative of color only. Driftwood Design Lab will not honor any claims made for these characteristics listed above if claimed as defects.
