GENERAL INFORMATIONS

- Colored body glazed porcelain tiles and rectified edges. Natural surfaces and anti slip surfaces. Rectified edges and cut edges.
- All sizes are nominal. The conversions into inches are approximate and rounded off.
- The boxes contain the item with different shade variations. When you lay down the tiles, in order to obtain the best blend of the colors, we advice you to take the tiles alternatively from different boxes and lay down orthogonally one to the other.
- For the rectangular sizes we suggest an installation pattern at a maximum of 1/4 of the entire length.
- Rectified edges: when you lay down single and multi sizes it is suggested to use grouts of at least 2 mm.
- We reserve the right to modify and/or remove the sizes, the calibers, the thickness and the graphics anytime, with no obligation of a further notice in writing.
- The shades of the samples are purely representative of the item itself so the shades variation and the surfaces variations cannot constitute the reason for a claim.
- Decorations, mosaics, special pieces or any cut item are made one by one, using handcrafts processes well, during the production cycle. Consequently, any imperfection should not be considered defect.

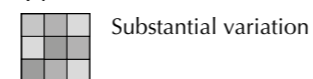

SIMBOLOGY

RET Rectified ⊕ Cut Item ○ Item on net * On request full boxes

① Tile with glued torello (on request only). For external use it's necessary to adopt all precautions for a perfect tile according to usage and regulations in force.

SHAPED TECHNOLOGY

3D Shaped Technology is a new digital process that is inserted in the production process to give maximum realism to ceramic products, through a surface forming process that enhances its conformation while preserving the characteristics of strength, durability and ease of cleaning typical of porcelain stoneware.

Combining vision and touch in a hyper-realistic realization without constraints or limits, 3D Shaped technology breaks the rules of the traditional concept of ceramic material which, from a two-dimensional vision, passes to a three-dimensional realization where every detail takes shape, colour and structure.

Development to find ever new technologies, able to offer all vanguard for the main international markets.
