

Reframing the Makers Heritage

## **Bestow** Reframing the Makers Heritage

Bestow porcelain tile collection highlights fiber arts in Bandura Design's inaugural collaboration with MILE<sup>®</sup>stone brand stories. Homespun artist's weaving, braiding, and macrame knotting inspire the tile's color, texture, and pattern.

For millennia, the art of weaving has been passed down generationally, culturally, and communally to offer heightened expressions of history and heritage. Time, tradition, and talent has - and continues to - create artistry using hair, thread, tapestry and whatever else is available to create delicate and durable art.

As many great artists are unsung, so often too have been the work of women's hands. Bestow celebrates their rich history and modern mastery with a tile collection to transform any space with imaginative expression.

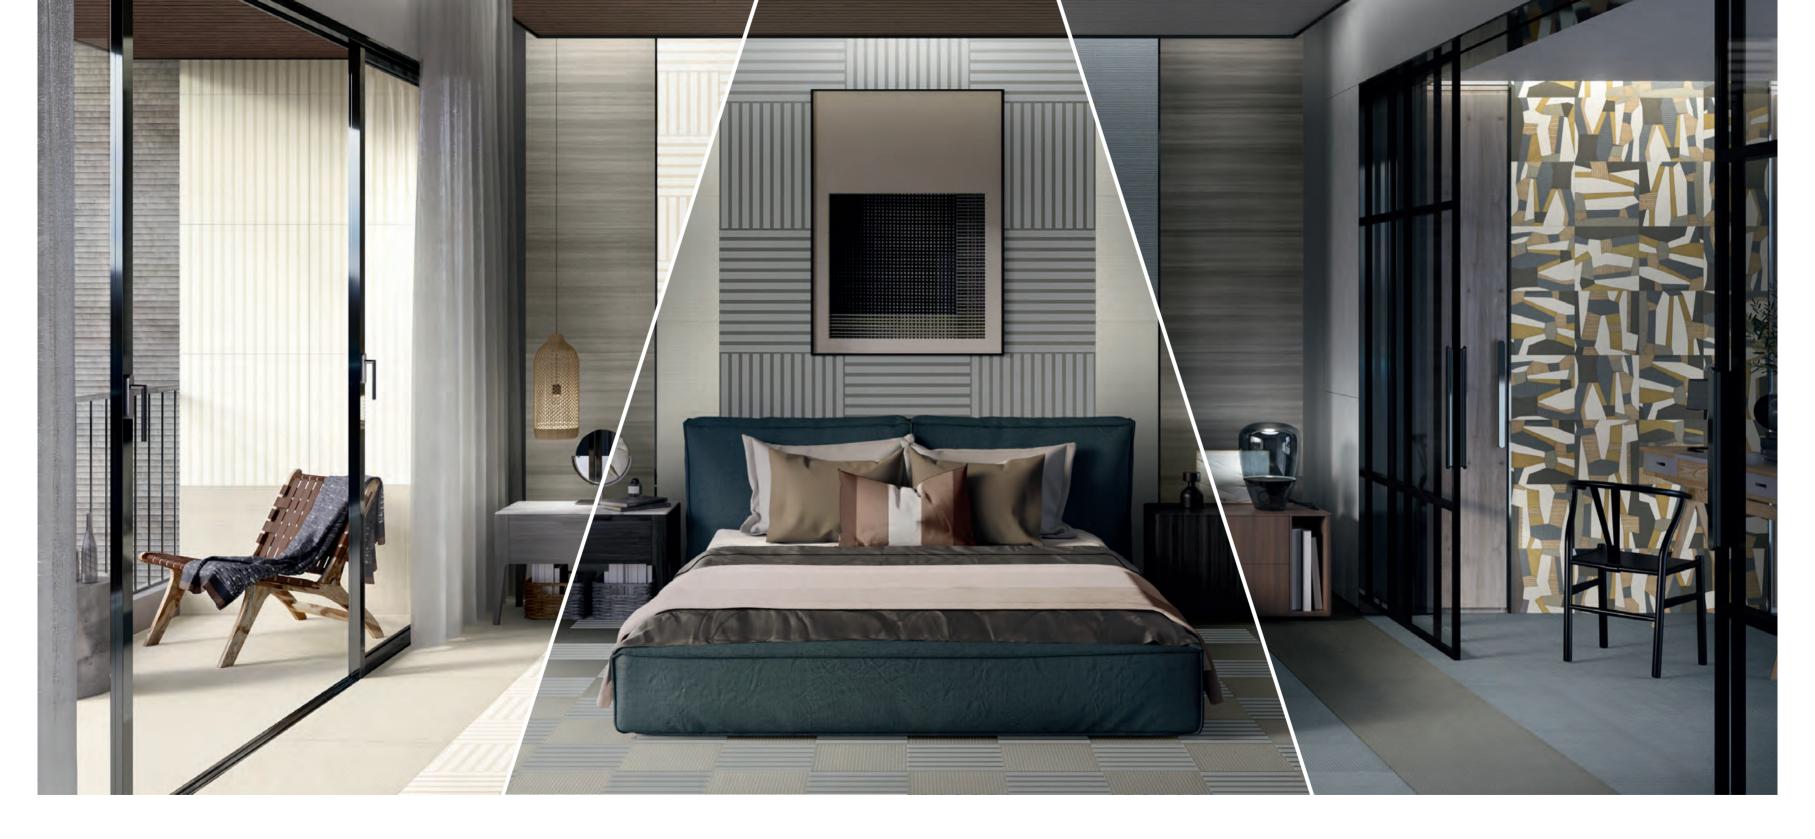

Allow the Bestow collection from Bandura Design to empower you to express the stories, teachings, and emotions, bestowed upon us by generations of women.

### the art of weaving

For thousands of years, the world over, women have handed down traditional knowledge of hand-made creations used both to survive and thrive as individuals and as a community.

#### Progress that invests in the entire society

As an active member of the U.S Green Building Council, MILE<sup>®</sup> stone spreads awareness to the community and encourages the use of building solutions through environmentally friendly practices.

Our products positively contribute to the requirements for obtaining the LEED (Leadership in Energy and Environmental Design) and WELL (IWBI) certifications.

### A commitment to environmental sustainability and responsibility

We are committed to conscious development that minimizes the negative impact of manufacturing production on the environment. Our general approach to sustainability intersects with our business strategy to embrace three areas of responsibility; economic, social, and environmental. Some ways we prove this are:

- Products containing as much as 45% recycled content.
- Post-consumer recycled content levels as much as 3%.
- · Zero industrial wastewater discharge.
- A 99% internal process recycling rate.
- Local sourcing of >95% raw materials (within 500-mile radius of factory) resulting in low transportation related carbon emissions.

MILE<sup>®</sup> stone is taking these and other steps, as well as actively investing to reduce carbon emissions to ensure that we reach full carbon neutrality by 2030.
