MINIATURES, A SMALL MIRACLE OF CERAMIC JEWELRY

The latest creation from the 1741 world is Miniature, Garden State Tile's small-size collection. A collection that unleashes in 6x24 centimeters a multiplicity of inspirations evoking workshops and art professions, from majolica to glass, from metal to painting. Small masterpieces of high craftsmanship that draw on the tradition of craftsmanship expertise with novel textural effects, precious components and installation methods that guarantee unique and original solutions. An aesthetic and technical miracle that testifies to the capacity for innovation of Made-in-Italy design.

THE TIMELESS ENCHANTMENT OF GLASSMAKING

Echoes of an art that become expressions of style and sophistication: the Miniature Soda collection reinterprets chromatic details, dances of reflections and elegant transparencies of Italian blown glass. References to the enchanting creations of an ancient craft now spring to life on the surface of this small ceramic size, with unchanged poetry. The inspiration of Miniature Soda looks at the magnificence of artistic masterpieces devised by the creative craftsmanship of artisans and brings it to life in the small 6x24 cm size.
