Frost	Resistant
Chemical Resistance	Unaffected
Scratch Hardness	7 mohs
Wet DCOF Range	0.42-0.52
Shade Variation	V2 /Trav Colors V3

POINTE USE & CARE

Recommended Use

Pointe is recommended for interior floors, interior walls, countertops, exterior walls, pool waterlines and full linings† in both residential and commercial applications. Pointe is not recommended for exterior horizontal surfaces or exterior paving. The Mixed Hex Mosaics and the 2 x 12 Deco pieces are to be used on interior walls only.

† Excludes mesh mounted mosaics.

Wet area use for Pointe Mosaics

Pointe is produced with the UPS finish. The ANSI A326.3 wet Dynamic COF of Pointe is ≥ 0.42 . Their small sizes ensure frequent grout joints which provides traction and drainage. GST cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning. This information is provided so that customers may make a realistic and informed decision when comparing to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Care and Maintenance

Regular cleaning is the best way to keep Pointe tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning. Rinse thoroughly and dry with a soft cloth. No waxes are needed.

Our Warranty

Products will meet or exceed the performance specifications outlined in ANSI A137.1 and in the performance data section of the general product catalog.
