CERTIFICATIONS

100% REUSE OF UNFIRED TILES

Crude waste generated by the process is reintegrated in the production cycle with no costs for the environment. This contributes to the safeguard of natural resources.

100% REUSE/RECYCLING OF THE INDUSTRIAL WASTE - FIRED TILES

The waste-fired tiles are fully reused in the production cycle. In addition, at the end of life, the tiles can be recycled as materials for substrates for roads and buildings, thus reducing the use of gravel and natural aggregates commonly used in building.

100% WATER RECYCLING

The water used in the production process is recycled. The water demand is strongly reduced by this mean.

PACKING MATERIAL IS 100% RECYCLABLE

Carton boxes, plastic packaging materials, wooden pallets, straps, etc.

100% OF NON CERAMIC WASTE

Is differentiated and recycled in other production cycles.

SAFETY REQUIREMENTS: NO FIRE REACTION

All ceramic tile products are Class A building materials as described in ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials. This is due to the flame spread rating of (0) and smoke developed rating of (0) falling within the ranges of a Class A material. Other building codes refer to this as a Type I material in accordance with NFPA 255.

METHANE CONSUMPTION IS HIGHLY REDUCED

By the use of up to date technologies and customized installations.

LOW EMISSIONS IN THE ATMOSPHERE

Production plant strictly complies to US Standards with a very small amount of gas emissions in the atmosphere.
